INTRODUCTION

Fine landscape architecture demands the highest quality materials which blend beauty and durability. Decking achieves this combination perfectly.

Decking brings together the qualities of low-maintenance, maximum durability and extraordinary natural beauty to offer the very best decking product available. Composites and softwood decking products don't compare.

Defined by its rich dark brown color and beautiful grain characteristics, Decking is nature's artwork for your deck. It can be oiled or stained to retain its rich natural color. Decking is available in sizes 1x4 through 2x12, 2x2 balusters, and 4x4 posts.

Decking is the strongest untreated decking material available. Deck legendary resilience makes it the perfect choice for both commercial and residential applications. In terms of strength, stability, durability, natural resistance to decay, wet conditions and all varieties of wood-boring insects, there is no better product on the planet.

Decking contains no harmful chemicals and can be used near water without fear of contamination. Given its life-long space durability and rich natural beauty, Decking is an economical and natural alternative to other decking options. Its rich color and breathtaking natural grain are certain to provide a lifetime of beauty and enjoyment.
