IS COMPOSITE DECKING GOOD AROUND POOLS?

The Look and Feel of Real Wood Comes at a Price

- Wood is expensive and requires on-going, costly maintenance.
- The family deck has to be stained and water-proofed with toxic chemicals.
- The wooden siding needs an expensive paint job every few years.
- Wooden fencing requires constant repair, and time-consuming paint jobs to keep up appearances.
- Real wood accents add to the cost of any home improvement or new construction.
- You have less time to enjoy your family and your home because your exterior wood always needs something.
- The planet suffers as more wood is harvested to meet the ever-growing demand for natural-looking wood

Uses select, recycled, high-density plastics, combined with recycled wood products, to create a composite wood substitute that drops your energy footprint to zero. Is made from recycled materials, and it's 100% recyclable down the line.

When you want the look of real wood, but you don't want the headaches of maintaining that beautiful façade, solves the problem

With lasts longer, requires less maintenance, and it puts recycled materials to good use creating the natural look of wood without all the work

The Look of Wood Without the Worry?

Uses recycled wood and plastics to create a fully-customizable improvement on traditional wood building products. delivers the natural look of wood without on-going, time-consuming maintenance and expense.

Looks like wood, but it's durable, environmentally friendly, and you won't spend hours staining and sealing your deck or home siding.

Nature Surface

Using its patent-pending process called delivers convenience, reliability, and a realistic texture that, not only makes your life better, all products combine the proven strength of high-density, recycled plastic with realistic wood fibers to deliver the look of wood; the look you demand.

Coating Layer

Ultra-Simple is enclosed in an impermeable seal so deck or home siding stands up to weather, sun, water, scuffs and scrapes. Your home looks good down the line because with durability is built in.

THINK GREEN! GO GREEN!

Concerned, responsible families care about the future of our planet. They recycle, preserve, and protect the natural beauty all around us.

Now, you can, too, with commitment to a cleaner, brighter future for our planet and future generations.

What Makes the Smart Green Choice?

All New products are produced using 95% recycled materials including plastic bottles, reclaimed wood fibers, and other products that would normally end up in a landfill

Undertakes annual, third-party audits to assure compliance with environmental, health, and safety regulations and guidelines - a demonstration of our commitment to a greener alternative to wood building products that deplete the planet's resources.

Shrinks your home's carbon footprint by using recycled materials constructed to be recycled again in the future.

Conserves home energy use. Our production processes are environmentally-friendly using energy- saving techniques to create an even greener composite that lasts for decades.

WPC has been recycling plastics for 30 years. Every single month, our company saves 12,000,000 pounds of plastic from ending up in our cramped landfills.

We control the fabrication process from start to finish, including proper plastics preparation, sorting and screening raw materials, so we know exactly what each WPC product contains, ensuring product consistency and integrity to the highest standards

Because we manage production from recyclable collection to manufacture and delivery, we can provide stable pricing, and reliable product availability

- ✔ Requires no painting, no glue, low maintenance
- ✔ Weather resistant, suitable from minus 40 to 60 C
- ✔ Easy to install and clean, low labor cost

Decking Accessories

WPC decking is super-simple to install.

Using a system of locking clips, installs quickly, but more than that, our proprietary controlled expansion and contraction clip eliminates warping, or any distortion of our industrial strength planking, providing decking that lasts for years with simple, easy maintenance.

Your deck expands and contracts under various weather conditions without creating wear and tear on individual planks using our easy to install clip systems that keep your deck looking its best for years to come.

T Clip System		Mini Clip System	
TC-2 (CEC Clip)	TC-1 (Locking Clip)	MG-1 (CEC Clip)	MG-2 (Locking Clip)

Due to the small gap of the MG Clips there might be differences in gap sizes after installation as the composite itself has width tolerances.

Please contact the manufacturer to understand if this clip is approved to be installed in your area.

STARTING CLIP

Setting the first board is easy using New Tech Wood's MG-3 Starting clip. They're invisible, easy to install, and these clips last and last so you don't have to worry or fuss over your new installation.

END CAPS

When you employ our lightweight, hollow core decking, these end caps finish the job, creating a clean, look that's guaranteed to last for years to come.
