

WPC Decking was engineered in mind to give you

**Low Maintenance.**

In 2010, GRID FLOORS began a project to design and formulate the most durable, most attractive, most fade and scratch resistant, most beautiful, and most reliable composite deck board in the industry. Two years of engineering and countless hours of field-testing has yielded a product of unmatched performance and beauty. Ultra Shield by our manufacture is a true game changer in the composite decking industry.

Conventional wood plastic composites are a thing of the past. Ultra Shield combines the proven strength of high-density polyethylene plastic and wood fibers with an outer shell of plastic that completely encapsulates the board in an impermeable layer of protection from scratches, stains, and fading. The plastic we use is a proprietary compound that includes the same plastic used to make high impact golf ball covers.

**Ultra Low Maintenance**

**Ultra Low Worry**

**Ultra Performance**

**Ultra Long Lasting Beauty**

Ultra Warranty

# Shield

- Shields patented formula provides color streaking and deep wood grains that bring you the warmth and beauty of wood without the maintenance.
- The Shield withstands high traffic without exhibiting signs of wear and tear as seen in conventional composite wood.
- Shield encases all four sides to give absolute protection from Mother Nature’s harshest conditions.

# Core

- Ultra Shield’s light core allows for less expansion and contraction and easier handling.
- The core uses coarse wood fibers for greater strength and durability.

Ultra Shield decking offers solid & hollow profiles, with the flexibility to choose between common screws and hidden fasteners.
